Fire Safety

AL13 is made of solid non-combustible aluminum extrusions.

CAN/ULC-S114 - non-combustible

ASTM E136 - passed

CAN/ULC-S102 - flame spread (0)
- smoke development (0)

ASTM E84 - flame spread (0) - smoke development (0)

woodgrains

douglas fir
v-1501/02

maple
v-1101/02

Wind + Water

AL13 Planks are cut to fit on-site, secured using system clips and system frame components, allowing for on-the-fly changes. AL13 system clips and extrusions work together to create a secure system with built-in moisture management.

AAMA 508 - pressure equalized rainscreen

ASTM E330 - windload

Intertek evaluated for

PRODUCT DESCRIPTION

PRODUCT FEATURES USA

- DESCRIPTION
 - Aluminum architectural cladding with high performance fluorocarbon coating finish or powder coated woodgrain finishes (Plank System).
- USES
 - Designed for cladding applications to provide a complete rain screen wall system.
- PRODUCT ATTRIBUTES AND CHARACTERISTICS
 - High performance fluorocarbon finish coating is available in a variety of standard colors including solid colors, wood line and metallic finishes. Custom colors are also available.
 - High performance powder coated woodgrain finish available in a variety of colors and patterns.
 - Extruded aluminum cladding.
 - Cladding dimensions and configurations allow for field adjustment and thermal movement.
- SELECTION CRITERIA
 - Attachment system allows for thermal movement due to thermal changes. The product should not be installed where surface temperatures are anticipated to exceed 180° F (82° C).
- SUSTAINABILITY CRITERIA
 - Contains recycled content and can contribute to LEED Material and Resources Credit 4 – Recycled Content.
- APPLICABLE CURRENT STANDARDS, RELATED REFERENCES
 - AAMA 508, Voluntary Test Method and Specification for Pressure Equalized Rain Screen Wall Cladding Systems.
 - ASTM B117 – Standard Practice for Operating Salt Spray (Fog) Apparatus.
 - ASTM D523 – Standard Test Method for Specular Gloss.
 - ASTM D714 – Standard Test Method for Evaluating Degree of Blistering of Paints.
 - ASTM D968 – Standard Test Method for Abrasion Resistance of Organic Coatings by Falling Abrasive.
 - ASTM D1308 - Standard Test Method for Effect of Household Chemicals on Clear and Pigmented Organic Finishes.
 - ASTM D2244 – Standard Practice for Calculation of Color Tolerances and Color Differences from Instrumentally Measured Color Coordinates.

PRODUCT DESCRIPTION

- ASTM D2248 – Standard Practice for Detergent Resistance of Organic Finishes.
 - ASTM D2794 – Standard Test Method for Resistance of Organic Coatings to the Effects of Rapid Deformation (Impact).
 - ASTM D3359 – Standard Test Methods for Rating Adhesion by Tape Test.
 - ASTM D3363 – Standard Test Method for Film Hardness by Pencil Test.
 - ASTM D4145 – Standard Test Method for Coating Flexibility of Pre-painted Steel.
 - ASTM D4214 – Standard Test Methods for Evaluating the Degree of Chalking of Exterior Paint Films.
 - ASTM E84 - Test Method for Surface Burning Characteristics of Building Materials.
 - ASTM E136 - Standard Test Method for Behavior of Materials in a Vertical Tube Furnace at 750°C.
 - ASTM E330 – Standard Test Method for Structural Performance of Exterior Windows, Doors, Skylights and Curtain Walls by Uniform Static Air Pressure Difference.
 - ASTM F1667 - Standard Specification for Driven Fasteners: Nails, Spikes, and Staples.
 - DAF-45, Aluminum Association Inc. Designation System for Aluminum Finishes.
- PERFORMANCE CRITERIA
 - General Cladding Properties:
 - Fire Propagation - ASTM E84
 - Flame Spread Index – ASTM E84: 0
 - Smoke Developed Index – ASTM E84: 0
 - Combustibility – ASTM E136 Option A: passed
 - Pressure Equalization – AAMA 508: Pass
 - Static Water Penetration (15 psf) – AAMA 508: Pass
 - Dynamic Water Penetration – AAMA 508: Pass
 - Structural Loading – AAMA 508: Pass; Design Pressure = 80 psf
 - Wind Loading- ASTM E 330: See Technical Data Sheet
- PACKAGING, HANDLING, PROTECTION, AND DELIVERY INSTRUCTIONS
 - Deliver materials and components in manufacturers' unopened containers or bundles, fully identified by name, brand, type and grade. Prevent damage during unloading, storing and installation.
 - Store, protect and handle materials and components to prevent twisting, bending, mechanical damage, contamination and deterioration.
 - Store materials off ground and keep clean, dry, and free of dirt and other foreign matter.
- SPECIAL WARRANTY

PRODUCT DESCRIPTION

- Fifteen year limited product warranty against physical defects of system components and products that are installed in compliance with published installation instructions and maintained according to the manufacturer's published guidelines.
- Powder Coated Woodgrains: Fifteen year limited finish warranty stating finishes shall be free from workmanship and material defects and free from fading, gloss retention, peeling, chipping, cracking or blistering of finish.
- LIMITATIONS
 - THE LIMITED WARRANTIES ARE SUBJECT TO THE FOLLOWING GENERAL PROVISIONS AND LIMITATIONS:
 - The limited warranties are effective only if there is proper storage, handling, installation and maintenance of the product in strict accordance with published instructions.
 - Claims must be made in writing to AL13®'s Product Performance Department within 30 days of the discovery of a problem and authorization obtained prior to beginning any repair or replacement work.
 - The Product Performance Department must be provided a reasonable opportunity to inspect and verify a claim.
 - AL13® shall have no liability for defects or damage resulting from:
 - Misuse or abuse;
 - Improper installation, including, but not limited to inadequate attachment and/or protection against all external damage;
 - Performance of coating other than those covered by the limited warranties;
 - Contact with harmful chemicals, fumes, or vapors;
 - Settlement, shrinkage or distortion of the structure; or
 - Fire, wind, flood, lightning, Acts of God, or other causes beyond the control and performance testing provided by AL13®.
 - AL13® shall have no liability for the cost of removing affected products.
 - Warranty for powder coated woodgrain coating is limited to 10 years in coastal areas within three miles of bodies of salt water and under the following condition:
 - Normal atmospheric conditions exclude corrosive or aggressive atmospheres such as those contaminated with chemical fumes, salt or other corrosive elements, including areas within 1,000 feet (305 meters) of a body of salt water.
 - Aluminum cladding must be separated from direct contact with dissimilar metals with an approved separation coating or layer.

PRODUCT DESCRIPTION

- SAFETY PRECAUTIONS
 - State safety concerns of product itself – or handling or installation precautions.
- AVAILABILITY
 - Available from appointed distributors. See distributor listing on website.
- COST
 - Consult distributors for specific product costs or relative costs.

PRODUCT PROPERTIES

- MATERIALS, COMPOSITION, PROPERTIES
 - Aluminum Extrusions: 6063 T5 aluminum alloy.
- ACCESSORIES
 - Fasteners for System Clips:
 - Attachment of System via Clip to Steel Substrate: #12-14 x 1 ½ inch (38 mm) drill-point fasteners with EPDM composite washers and corrosion-resistant coating. Installed every 32 inches (81.28 cm) on center.
 - Attachment of System via Clip to Wood Substrate: #12-14 x 1 ¾ inch (44.45 mm) mini drill-point fasteners with EPDM composite washers and corrosion-resistant coating. Installed every 32 inches (81.28 cm) on center.
 - Fastener Corrosion Resistance:
 - Carbon Steel: Coated to provide not less than 1,700 hours of ASTM B 117 salt spray performance with no white or red rust; 18 cycles of ASTM G 87 (DIN 50018) SO² Kesternich testing with not more than 15 percent red rust.
 - Fasteners for Frame Components:
 - Attachment of System frame components to Steel Substrate: #10-16 x ¾ inch (19.05 mm) self-drilling screws with corrosion-resistant coating. Installed every 24 inches (60.96 cm) on center.
 - Attachment of System frame components to Wood Substrate: #12-14 x 1 ½ inch (38 mm) mini drill-point fasteners with EPDM composite washers and corrosion-resistant coating. Installed every 16 inches (40.64 cm) on center, unless securing a segmented (3 ¼ inch) (8.25 cm) backplate (installed 16 inches (40.64 cm) on center), in which case two fasteners per segmented piece are required.
 - Fastener Corrosion Resistance:

PRODUCT DESCRIPTION

- Carbon Steel: Coated to provide not less than 1,700 hours of ASTM B 117 salt spray performance with no white or red rust; 18 cycles of ASTM G 87 (DIN 50018) SO² Kesternich testing with not more than 15 percent red rust.
- **SHAPE, MASS, AND DIMENSION**
 - Cladding Weight: 1.35 lb/ft² (6.59 kg/m²)
 - Profile: Solid or Woodgrain Pattern (See finishes for additional information.)
 - Standard cladding size of 144 inch x 4 or 6 inch (3658 mm x 100 or 152 mm)
- **FINISH, COLORS AND TEXTURES**
 - Powder coated woodgrain finish in compliance with AAMA 2604.

PRODUCT INSTALLATION

- **PREPARATION**
 - Ensure structural supports are aligned and meets structural requirements for wind loading and gravity loads.
 - Ensure building surfaces are smooth, clean, dry and free from defects detrimental to installation of cladding system.
 - Ensure framing is planar with variations on not more than ¼-inch in ten feet.
 - Inspect cladding and components before installation and verify that there is no shipping, storage, or staging damage. Do not install damaged cladding. Remove from jobsite to avoid re-application.
 - Ensure all products received are as ordered/required for project, including finish and size.
- **INSTALLATION**
 - Install products in accordance with manufacturer's published handling and installation instructions.
 - Erect components plumb and true.
 - Adjust assembly to secure cladding safely to wall while allowing for calculated expansion and contraction of components. Ensure extrusion tabs overlap cladding edges by at least half of extrusion tab depth.
 - Do not cut, trim, weld, or braze component parts during erection in manner which would damage finish, decrease strength, or result in visual imperfection or failure in performance.
 - Apply isolation coating to areas of contact between dissimilar metals.

01

✓ Cleaning & Maintenance

Dirt and other deposits may naturally accumulate due to specific environmental conditions. These build ups and deposits take away from the original aesthetic properties. AL13® recommends implementing a regular cleaning program to maintain the best possible appearance.

General cleaning:

- Surfaces may be cleaned with water using a soft brush or sponge free of debris. Avoid excessive rubbing.
- If necessary, surfaces may be cleaned with a mild detergent (pH 6-7) or cleaning agent diluted 1:50 parts water.
 - Some cleaning products may damage the finish. Using highly acidic or alkaline cleaning agents may corrode the aluminium and paint. If unsure, complete a small test area in an inconspicuous location before proceeding. If the solution results in any irregularities to the finish, discontinue use immediately. Always use all recommended safety precautions including appropriate skin and eye protection to prevent irritations or burns.
- After cleaning occurs, surfaces should be rinsed with clean water to remove any residue that might be present.
- To reduce the appearance of water spots or streaking, surfaces should be squeegeed or wiped dry with a clean cloth before the water is allowed to do so naturally. Surfaces heated by the sun will dry more quickly.

02

✗ Do Not

- Do not clean AL13® using steel wool or abrasive pads.
- Do not clean AL13® with Acetone, paint thinners or removers.
- Do not clean AL13® with highly acidic or alkaline solutions.
- Do not clean AL13® with a pressure washer.

AL13[®] Plank System Installation Guide

How to Install

AL13®
architectural
system

Installation Guidelines 1

IMPORTANT: Failure to follow the guidelines will void the AL13® warranty.

Please read and understand the entirety of this guide. Any questions or inconsistencies should be directed to your sales representative or info@al13.com

Standard carpentry skills are required for optimum results.

Good health and safety practices must be followed when installing AL13® Systems.

Key steps for a successful installation

- 01 Understand the various elements of the system.
 - 02 Plan the installation, work schedule, layout, and material usage.
 - 03 Ensure everyone working has read the installation guidelines.
 - 04 Execute work in the sequence set forth in the installation guidelines.
 - 05 Protection should be worn, ear protection, safety glasses and hard hat.
 - 06 Protect the product by storing the material in a dry and clean environment.
 - 07 Ensure proper fit of the system.
 - 08 Upon completion of installation, clean any debris on wall.
-

Key steps for a successful installation

When materials arrive on site, ensure that all panels, extrusions, and other components are in good condition. All material should be free of any defects.

- > Shipping or packaging issues should be noted on the waybill and then reported to the distributor.
- > Should any products be damaged, the receiving party is responsible for filing a freight claim to the shipping company within 24 hours of receiving product.
- > Defective materials should be reported to the distributor from which the product was dispatched from.

Installation Guidelines 2

Product Legend: This installation guide will discuss various components of the system and use component reference blocks. Please refer to the following to verify the correct component.

Component	Size / piece	Material
 6" Plank	12' length	AAMA 2604 coated aluminum extrusion
 4" Plank	12' length	AAMA 2604 coated aluminum extrusion
 Perforated 2" Plank	12' length	AAMA 2604 coated aluminum extrusion
 End Frame	12' length	AAMA 2604 coated aluminum extrusion
 Inside Corner	12' length	AAMA 2604 coated aluminum extrusion
 Outside Corner	12' length	AAMA 2604 coated aluminum extrusion
 Half Back Plate	8' length	Anodized aluminum extrusion
 Full Back Plate	8' length	Anodized aluminum extrusion
 Reveal Cap	12' length	AAMA 2604 coated aluminum extrusion
 Perimeter Reveal Cap	12' length	AAMA 2604 coated aluminum extrusion
 Perimeter Flat Cap	12' length	AAMA 2604 coated aluminum extrusion

Installation Guidelines 3

Component	Size / piece	Material
 Flat Cap	8' length	AAMA 2604 coated aluminum extrusion
 Plank System Clip	box (100)	Fiberglass reinforced plastic
 Panel Joint Clip + Fastener Kit	box (100)	Fiberglass reinforced plastic
 Wood Fastener (for frame components)	500/package 1-1/2" long	12 – 14 x 1 1/2" mini drill-point fasteners with EPDM washers and corrosion-resistant coating
 Plank Fastener (for Plank System clips)	500/package 1-3/4" long	12 – 14 x 1 3/4" mini drill-point fasteners with EPDM washers and corrosion-resistant coating
 80T Non ferrous Saw Blade	10" - each	carbide tip / high-speed steel
 60T Non ferrous Saw Blade	6-1/4" - each	carbide tip / high-speed steel
 AL13® Gloves	each	rubber / lycra
 Flat SLED	each	plastic and rubber
 Reveal SLED	each	plastic and rubber
 AL13® Tape	108' roll	AL13® double sided acrylic adhesive tape

Installation Guidelines 5

Inventory

Once material is verified to be in good condition, take inventory of units according to the packing slip. Make sure all materials and quantities are present.

- *The distributor should be notified immediately if the order has any missing or incomplete components. Failure to do so may void re-fulfillment.*

Tools

AL13® is made to be installed with general tools. A recommended tool list is as follows:

- | | |
|--|---------------------------|
| > Sawhorses/work table | > Jigsaw |
| > Circular saw, handheld with guide | > Level/plumb line |
| > Table saw | > Chalk line |
| > Cordless electric impact with appropriate bits | > Cordless electric drill |
| > AL13® saw blades | > Drill bit set |
| > Mitre saw | > AL13® SLED |

Install 01

Fasten vertical perimeter extrusions

The vertical perimeter extrusions are normally the first extrusions to be fixed to the wall. The building wrap/envelope must be complete to spec before anything goes on the wall. Layout end frame extrusions according to the desired location. Ensure frames are level and plumb before fastening.

Work flow is always from the bottom up. Place the first fastener near the bottom of the vertical extrusion. Once the piece has been leveled, add a second near the top fixing it in place and add subsequent fasteners.

Install 02

Fasten horizontal baseline extrusions

This will establish the horizontal datum - and will be a reference to subsequent extrusions - so it is important that it is mounted level.

Install 03

Fasten horizontal upper extrusions

The final perimeter extrusion to be attached is the upper horizontal back plate.

Install 04

Engage baseline flat cap

The flat cap needs to be cut to size and engaged using an AL13® SLED before the first row of the planks may be installed. A properly cut cap should tuck under both verticals leaving approx. a 1/8" gap on either side to allow for contraction and expansion. If a butt joint is required due to the length of the flat cap exceeding 12', the butt joint **MUST** occur on a shared back plate segment.

It is only necessary to engage flat cap where the back plate is present. Impacting the flat cap in the voids, between back plates, will cause deformation of the top cap.

Install 05

Installing planks

System Clips should be installed before the Plank is placed in position on the wall. System Clips / Planks should not be hammered into place under any circumstance.

A properly cut plank should have a 1/8" gap from the components on either side to allow for thermal expansion.

It is essential the first row of plank be tucked behind the vertical tab of the frame components so that the fastening tongue is pointed upwards and the groove is pointing downwards.

Once the plank has been fitted and leveled to an even plane, it will be secured by attaching an AL13® Plank System clip to the upwards pointing tongue. The narrow face of the clip should be pointing away from the wall. Make sure the clip is fully inserted before adding fastener to the through-hole. The function of the clip is to secure the plank in place while spacing it from the wall. The fastener will not penetrate the plank itself. A clip and fastener are to be attached to each plank once every 32" MAX. A minimum of one system clip is required per plank.

The maximum consecutive run of plank will be 24' without a vertical brake. (End frame, flat cap, or reveal cap) If the required length exceeds 12', joining two planks together will be required. A Plank Joint clip is to be used at the seam of the butt joint to ensure a precision fit.

Install 06

Installing the final row of plank

The final or top row to be installed may require the plank to be ripped to width by a table saw to its appropriate dimension. Due to this, the top rows installation may vary from the regular installation.

If it is required to rip the plank down to a narrower width, the tongue side of the plank is to be removed. In the case of the top row of plank will be held in place by securely engaging the perimeter flat cap and a plank system clip is clipped on to the perimeter back plate.

Install 07

Installing the final row of plank

To secure the final row, a perimeter flat cap must be cut to length to fit behind the vertical frame extrusions. A proper fit should allow for a 1/8" gap on either side to allow for contraction and expansion. The perimeter flat cap should be hammered in place using an AL13® SLED with a rubber mallet.

AL13® Product Warranty

AL13® plank system - 15 YEAR LIMITED PRODUCT WARRANTY, when properly installed and maintained according to the published application. Product is warranted for a period of fifteen (15) years from the date of installation from physical defects. Registration of the product is required for the warranty to be in effect. This warranty is valid for the original purchaser. This warranty provides the following coverage: (a) splitting or cracking of the product, sustained excessive deformation of the product under normal conditions of use and (b) to be free of any buckling of the product itself that is not associated with the substrate and/or structure to which the AL13® plank system is attached. For the purpose of this warranty, buckling shall be defined as warping of the product(s) exceeding one eighth of an inch out of plane per linear foot. If AL13®, after inspection and verification, determines that the product failed under the terms of this limited warranty, the sole and exclusive remedy follows: within a reasonable amount of time after the inspection, repair or replace (at AL13®'s discretion) the defective portion of the product, or may refund the owner for the product(s) affected area, and a reasonable cost of installation. During the warranty period following installation, AL13® will compensate the Owner for correcting the affected area(s) (limited to no more than the original cost of installation) until the end of the limited warranty period for the affected area(s).

Wet Coat Finish Warranty

AL13® - 20 YEAR LIMITED FINISH WARRANTY. AL13® hereby warrants that all finishes on the coated aluminum for 20 years from the date of purchase will not under normal atmospheric conditions: (a) peel, check or crack except for such slight crazing or cracking as may occur on certain areas of the panel; or (b) (1) chalk in excess of a numerical rating of 8 measured in accordance with the standard procedures as outlined by the “Standard Methods of Evaluating Degree of Chalking of Exterior Paint” - ASTM D4214-89; or (2) fade or change in color in excess of 5 color difference units, using ASTM D2244-89 measured on the exposed painted surfaces which have been cleaned of external deposits and chalk and the corresponding values measured on the original or unexposed painted surfaces. The foregoing being subject to the understanding that fading or color changes may not be uniform if the surface is not evenly exposed to the sun and elements; and that gloss (60° incident angle) loss will not exceed 40% when measured on exposed painted surfaces which have been cleaned of external deposits and the corresponding values measured on unexposed original painted surfaces. The gloss shall be measured using standard procedures as defined by “Standard Test Method for Specular Gloss” - ASTM D523-89.

Woodgrain / Solid Color/ Powder Coat Finish Warranty

AL13® - 15 YEAR LIMITED FINISH WARRANTY. AL13® hereby warrants that all finishes on the product coated for 15 years from the date of purchase will not fade in color more than five units as measured by hunter lab color difference as set forth in ASTM D2244 section 6.3 as of the application date and in such way as to significantly adversely affect the appearance of the surface to which the product has been applied and result in damage to the surface. Coated surface will exhibit gloss retention of a minimum of 50% of the original as measured in accordance with ASTM D523 using 60 degree reading. In addition, coating shall not chalk in excess of standard number 8 as illustrated in the ASTM D64214 test method. Coatings when applied and cured on a clean, pretreated substrate will not peel, chip, crack or blister.

Finish Warranty Conditions

The AL13® finish warranty is subject to the following conditions. (a) The warranty only applies under normal atmospheric conditions and excludes corrosive or aggressive atmospheres such as those contaminated with chemical fumes, salt or other corrosive elements, including areas within 305 meters (1000 feet) of a body of salt water. AL13® recommends a fresh water cleaning/maintenance program be in effect to prevent corrosion from accumulated deposits. (b) The warranty will not apply to any coated surface, which is not on the exterior surface of a building. (c) The warranty will not extend or The AL13® plank system finish warranty is subject to the following conditions: (a) Normal atmospheric conditions exclude corrosive or aggressive atmospheres such as those contaminated with chemical fumes, salt or other corrosive elements, including areas within 305 meters (1000 feet) of a body of salt water. AL13® recommends a fresh water cleaning/maintenance program be in effect to prevent corrosion from accumulated deposits (b) The warranty will not apply to any coated surface, which is not on the exterior surface of a building. (c) The warranty will not extend or cover: (1) Damage to the coating occasioned by moisture or other contamination detrimental to the coating because of improper storage of the coated metal prior to installation; (2) Water damage due to condensation caused by improper packaging of the coated metal prior to installation; (3) Damages to the coated metal caused by handling, shipping, processing and/or installation; or (4) Damages to the coated metal caused by scratching or abrading after installation; or (5) Damages to the coated metal as a result of standing water in horizontal installations; (d) The warranty will not be applicable to damage or failure, which is caused by acts of God, falling objects, external forces, explosions, fire, riots, civil commotions, acts of war, or other such similar or dissimilar occurrences beyond AL13®'s control. (e) Customer shall maintain adequate records to establish identification of the coated material and dates of the installation of the coated metal. Customers shall demonstrate that the failure of the coated metal was due to a breach of he warranty stated herein. (f) AL13® exclusive liability under this warranty, or otherwise, will be limited to refinishing, repairing or replacing - at AL13®'s sole option - the defective coated metal. The warranty on any refinished, repaired or replaced coated metal supplied hereunder shall be for the remainder of the warranty period applicable to the originally coated metal. All warranty work will be performed by a company or contractor selected by AL13®, including the initial inspection to verify the claim. Color variance between replacement or repainted product and original shall not be indicative of a defect.

Disclaimer of Implied Warranties & Limitations of Remedies

THE LIMITED WARRANTIES STATE THE ENTIRE LIABILITY OF AL13® WITH RESPECT TO THE PRODUCTS COVERED BY THEM. AL13® SHALL HAVE NO LIABILITY FOR ANY INCIDENTAL OR CONSEQUENTIAL DAMAGES. NO PERSON IS AUTHORIZED TO MAKE ANY REPRESENTATION OR WARRANTY ON BEHALF OF AL13® EXCEPT AS EXPRESSLY SET FORTH ABOVE, AND ANY SUCH STATEMENT SHALL NOT BE BINDING ON AL13®. EXCEPT AS EXPRESSLY SET FORTH ABOVE, AL13® MAKES NO WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING, WITHOUT LIMITATION, ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. WARRANTIES SHALL BE THE DURATION OF THE LIMITED WARRANTY OR SUCH SHORTER DURATION AS PROVIDED UNDER APPLICABLE LOCAL LAW. THESE LIMITED WARRANTIES GIVE YOU SPECIFIC LEGAL RIGHTS, AND YOU MAY ALSO HAVE OTHER RIGHTS WHICH VARY FROM AREA TO AREA. All questions concerning the meaning or applicability of this limited warranty are to be decided under the laws of Washington State in the United States of America without reference to its choice-of-law rules. Any claims, demands or causes of action for defects or representations of any nature or damages arising from such defects or representations shall be subject to the exclusive jurisdiction of courts located in Washington State. CUSTOMER ACKNOWLEDGES AND AGREES TO THE FULLEST EXTENT PERMITTED BY LAW TO LIMIT THE LIABILITY OF AL13® FOR ANY CLAIMS, LOSSES, COSTS, DAMAGES OR CLAIMS EXPENSES FROM ANY CAUSE(S) (INCLUDING ATTORNEYS' FEES AND COSTS AND EXPERT WITNESS FEES AND COSTS), SO THAT ANY TOTAL AGGREGATE LIABILITY OF AL13® TO THE CUSTOMER SHALL NOT EXCEED THE CONTRACT PRICE PAID BY CUSTOMER. THIS LIMITATION APPLIES TO ANY LIABILITY OR CAUSE OF ACTION, HOWEVER ALLEGED OR ARISING, INCLUDING THOSE SEEKING CONSEQUENTIAL DAMAGES. THIS DISCLAIMER AND EXCLUSION SHALL APPLY EVEN IF THE EXPRESS WARRANTY SET FORTH ABOVE FAILS OF ITS ESSENTIAL PURPOSE. CUSTOMER ACKNOWLEDGES AND AGREES THAT AL13® HAS SET ITS PRICES IN RELIANCE UPON THE DISCLAIMERS OF WARRANTY AND THE LIMITATIONS OF LIABILITY SET FORTH HEREIN, REFLECTING AN ALLOCATION OF RISK BETWEEN THE PARTIES (INCLUDING THE RISK THAT A REMEDY MAY FAIL OF ITS ESSENTIAL PURPOSE AND CAUSE CONSEQUENTIAL LOSS), AND THAT THE SAME FORM AN ESSENTIAL BASIS OF THE BARGAIN BETWEEN AL13® AND CUSTOMER.CONSEQUENTIAL LOSS), AND THAT THE SAME FORM AN ESSENTIAL BASIS OF THE BARGAIN BETWEEN AL13® AND CUSTOMER.

Limitations

THE LIMITED WARRANTIES ARE SUBJECT TO THE FOLLOWING GENERAL PROVISIONS AND LIMITATIONS. The limited warranties are effective only if there is proper storage, handling, installation and maintenance of the product in strict accordance with the instructions. Claims must be made in writing to AL13® within 30 days of the discovery of a problem and authorization obtained prior to beginning any repair or replacement work. The claimant must provide proof that he / she is a covered person. Claims can be made by writing to AL13® at the Product Performance Department. After receiving such notice, AL13® must be given an opportunity to inspect and verify the claim. AL13® shall have no liability for defects or damage resulting from (a) misuse or abuse, (b) improper installation, including, but not limited to, inadequate protection against all external damage, (c) performance of coating other than those covered by the limited warranties, (d) contact with harmful chemicals, fumes, or vapors, (e) settlement, shrinkage or distortion of the structure, or (f) Fire, wind, flood, lightning, acts of God or other causes beyond the control of AL13®. AL13® shall have no liability for the cost of removing affected products.
