No additional off-site fabrication required. Panels are cut to fit on site and secured using a patented process, saving time and money.

Wind + Water
AL13® Panels are cut-to-fit on site and secured using the system frame components - allowing for on-the-fly changes. AL13® system clips and extrusions work together to create a secure system with built-in moisture management.

AAMA 508 - pressure equalized rainscreen
ASTM E330 - windload

Fire Safety
AL13® Panels are available in standard polyethylene (PE) or Class A2 fire rated (FR) core - the highest quality fire resistant panels on the market.

CAN/ULC-S102
FR Core
- flame spread (0)
- smoke development (5)

ASTM E84
FR Core
- flame spread (0)
- smoke development (30)

CAN/ULC-S134
FR Core only

NFPA 285
FR Core only

Finish
The AL13® Panels System is available in 9 standard solid, 5 wood grains and 4 metallic finishes - custom color matching also available.

AAMA 2605 - coating finish standard

20 year finish warranty

Patented
Years of R&D has allowed AL13® to create an innovative system solution to on-site installation and lead time constraints inherent with other products.

Get the look of wood, with the durability of metal.

Beyond Innovation
We went back to the drawing board - we started with a blank sheet of paper with the goal of addressing 3 key features that other lookalikes have missed.

Improved Moisture Management
New profile behind the plank to increase rain screen functionality.

Better Material Optimization
Improved strength to weight ratio.

Timeless Look / Precision Install
Classic profile design that allows for increased installation precision within 0.5mm (20 thou) for reduced risk of compression resulting from material expansion and contraction across the width of the plank.

Finish
Our system comes in 6 wood grains. Custom color matching also available.
AAMA 2604 - coating finish standard
15 year finish warranty

Fire Safety
AL13® is made of solid noncombustible aluminum extrusions.
CAN/ULC-S114 - non-combustible
ASTM E136 - passed
CAN/ULC-S102 - flame spread (0)
ASTM E84 - smoke development (0)
