**Product Name:   System Clip: Plank**

**Product Code:**   SCP
**Packaging:**   Package of 100
**Material:**   Galvanized Steel, 0.31in (0.8mm) thick

## Description:

SCP

Fasten to substrate

*Rotate to install*

AL13 Plank

The **System Clip: Plank** provides an interface between AL13® Planks and the substrate. They secure the planks to the wall with an AL13®-approved fastener appropriate for the substrate. The SCP can only be engaged in one position correctly.

The SCP can also be used to create a butt joint (plank ends must be square with no burrs). Joint screws are installed through the joining holes.

Attach an SCP and a fastener to each plank once every **32in max**.  If the plank length is less than 32in, a minimum of one system clip is required per plank.

Note the SCP engages correctly in one position only.

$1\frac{3}{8}$in [34.9mm]

$\frac{11}{16}$in [16.8mm]

Length = 2 ⅜in [ 60mm]

Joint Screws

Squared and deburred ends
