

The logo for DAL13 architectural systems is positioned in the upper right corner of the image. It features the word "DAL13" in a large, bold, white sans-serif font, with "architectural" in a smaller, lighter weight of the same font directly below it. The word "systems" is written in a smaller, italicized sans-serif font, positioned to the left of "architectural". A registered trademark symbol (®) is located at the end of "systems". The entire logo is set against a background of a modern building and a sunset sky.

DAL13 architectural  
systems®

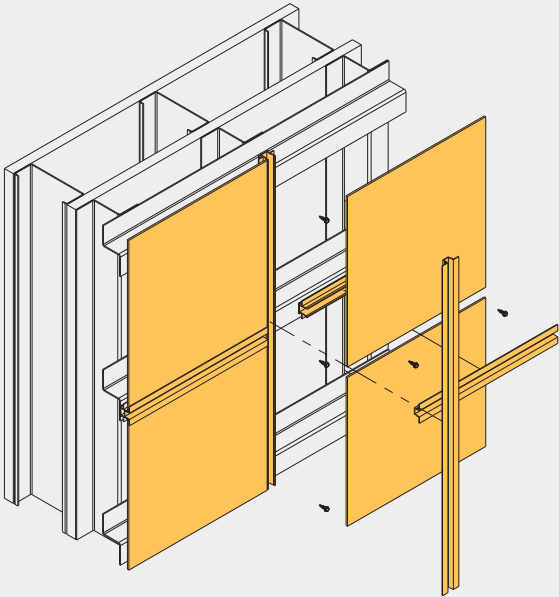

**ACM made accessible.  
Cut-to-fit on site for  
easy installation, saving  
time and money.**

Using a patented process, our ACM panels are secured using AL13® system-compatible frame components. Seamless transitions, flexible design options, and on-site customization for easy installation.

Walls

Soffits

**Where does the panel system go?**

From walls, fascia, soffits, accents, on projects small to big, low to high - we've got you covered.

**Sizing**

Standard 4mm ACM panel is 4' x 8'  
Custom sizes are available.

**Testing**

AL13® panels are available in standard polyethylene and fire resistant mineral cores. AL13® system clips and extrusions work together to create a secure system with built-in moisture management. AL13® panels are third-party tested and listed with North American registrations covering wind, water, and fire.

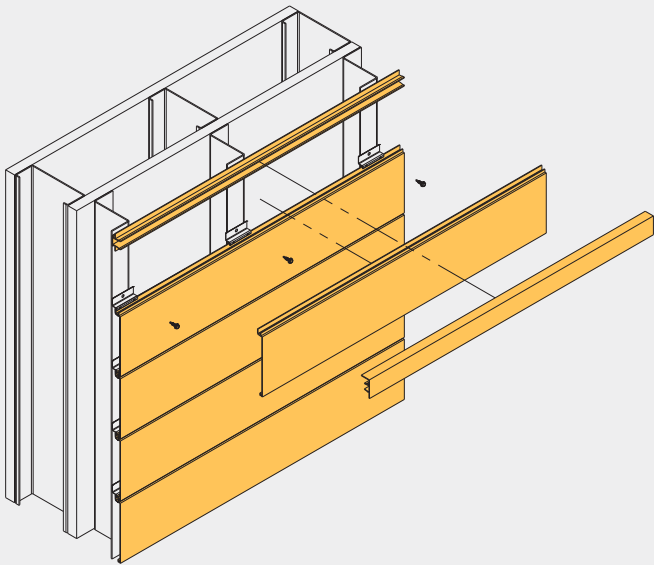

- NFPA 285**  
**ASTM E84**  
**ASTM E330**  
**AAMA 508**
- AAMA 2605**  
**CAN/ULC-S134**  
**CAN/ULC-S102**  
**WUI - Ignition Resistant**

**Get the look of wood, with  
the durability of metal.  
A proprietary system with  
built-in rain screen.**

Modern profile design with 1/8" shadow line that matches real timber. Easy to handle and rigid 12' length planks allow a single installer to complete any project.

Walls

Soffits

**Where does the plank system go?**

From walls to soffits - achieve the beauty and warmth of wood without all the maintenance.

**Sizing**

4" and 6" Plank  
2" Perforated Vent Strip

**Testing**

AL13® planks are made of solid non-combustible extruded aluminum. AL13® system clips and extrusions work together to create a secure system with built-in moisture management. AL13® planks are third-party tested and listed with North American registrations covering wind, water, and fire.

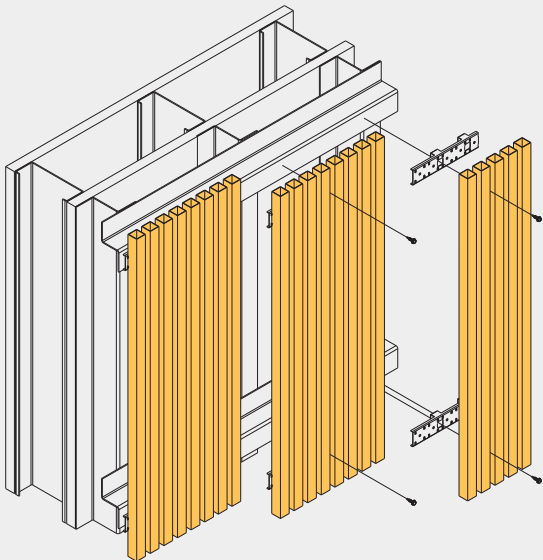

- ASTM E136**  
**ASTM E84**  
**AAMA 508**  
**ASTM E330**
- AAMA 2604**  
**CAN/ULC-S114**  
**CAN/ULC-S102**  
**WUI - Non-combustible**

**Innovative facades in  
wood look or solid colors.  
Intricate designs, simple  
installations.**

Open joint batten system is cut to size, easily assembled on site, and secured directly to the substrate for both interior and exterior applications.

## About

AL13® was created by installers who were unable to access quality ACM cladding solutions for their clients. Since 2011, we've meticulously engineered proprietary systems to create the most seamless installation experience possible. The result is millions of square feet sold through a network of North America's largest building products distributors who understand first-hand the difference that AL13® makes for their customers.

Our systems are third-party tested and proven to resist sagging, peeling, corroding, fading, warping, rotting, or cracking, unlike traditional cladding and soffit applications.

AL13® products are made of coated aluminum, providing an outstanding low-maintenance finish that can endure the elements, significantly reducing lifetime cost when factoring in maintenance, repair, and replacement associated with most building envelope alternatives.

The comprehensive approach we've taken to design and engineer each product specific for our AL13® patented and proprietary systems means that we're able to deliver an end user experience that is truly greater than the sum of its parts.

## Your Project

Let us show you how AL13® can benefit your project. Submit your drawings at [www.AL13.com/estimates](http://www.AL13.com/estimates) for a takeoff and material estimate.
